

Section 3 - Individuals/Firms Interested in Doing Archaeological Contracting

- Archeological Surveys**

The nature and extent of archeological resources in a project area, if any, are most efficiently determined by a two-step process. First, it is necessary to determine whether archeological resources actually exist in your project area. The state Department of Natural Resources Office of History and Archaeology has known sites listed that have been previously reported. From the known sites it can be determined if archeological resources may be present in your specific project area. Generally, a qualified archeological, as defined by the Department of Interior's Standards, will conduct a literature and file search to define which specific types of cultural resources are likely to be encountered. Following this, the archeologist will conduct a field investigation in which subsurface testing will be the major component, unless the presence or absence of resources can be determined by direct observation.

If sites have been identified, it is then necessary to conduct a more detailed site examination study of each resource. The extent of this more detailed investigation is dependent upon the type of archeological site under consideration.

- Archeological Contractors**

The following is a list of individuals and firms who wish to participate in

archaeological contracting. The organizations and individuals on the list are not certified in any way by the State Office of History and

Archaeology. It is up to a contractor to make sure that the individual or firm is qualified to do the work for which they are contracted, if such requirements apply (i.e., on a federally licensed, funded or permitted project or on a similar state project).

This list is provided on an informal, as needed basis to persons interested in contracting for archeological work. The list is provided by the State Office of History and Archaeology, and is by no means complete. The list is provided as a convenience only and suggested additions are always welcome. For suggested additions or corrections, please contact the Office of History and Archaeology, 550 West 7th Ave., Suite 1310, Anchorage, AK 99501-3565. Phone: (907) 269-8721.

- **Archaeologist Professional
Qualification Standards**

The above list of archeological contractors who wish to be considered for such work in Alaska must submit documentation which demonstrates that they meet the qualifications of the National Park Service's 36 CFR 61. The following qualification standard definitions are required for archaeologists:

In the following definitions, a year of full-time professional experience need not consist of a continuous year of full-time work but may be made up of discontinuous periods of full-time or part-time work adding up to the equivalent of a year of full-time experience.

(a) **History.** The minimum professional qualifications in history are a graduate degree in history or closely related field; or a bachelor's degree in history or closely related field plus one of the following:

(1) At least two years of full-time experience in research, writing, teaching, interpretation or other demonstrable professional activity with an academic institution, historical organization or agency, museum, or other professional institution; or

(2) Substantial contribution through research and publication to the body of scholarly knowledge in the field of history.

(b) **Archeology.** The minimum professional qualifications in archeology are a graduate degree in archeology, anthropology, or closely related field plus:

(1) At least one year of full-time professional experience or equivalent specialized training in archeological research, administration or management;

(2) At least four months of supervised field and analytic experience in general North American archeology; and

(3) Demonstrated ability to carry

research to completion.

In addition, to these minimum qualifications, a professional in prehistoric archeology shall have at least one year of full-time professional experience at a supervisory level in the study of archeological resources of the prehistoric period.

A professional in historic archeology shall have at least one year of full-time professional experience at a supervisory level in the study of archeological resources of the historic period.

(c) ***Architectural history.*** The minimum professional qualifications in architectural history are a graduate degree in architectural history, art history, historic preservation, or closely related field, with course work in American architectural history; or a bachelor's degree in architectural history, art history, historic preservation, or closely related field plus one of the following:

(1) At least two years of full-time experience in research, writing, or teaching in American architectural history or restoration architecture with an academic institution, historical organization or agency museum, or other professional institution, or

(2) Substantial contribution through research and publication to the body of scholarly knowledge in the field of American architectural history.

(d) ***Architecture.*** The minimum professional qualifications in architecture are a professional degree in architecture plus at last two years of full-time professional experience in architecture; or a State license to practice architecture.

(e) ***Historic Architecture.*** The minimum professional qualifications in historic architecture are a professional degree in architecture of State license to practice architecture, plus one of the following:

(1) At least one year of graduate study in architectural preservation, American

architectural history, preservation planning, or closely related field; or

(2) At least one year of full-time professional experience on historic preservation projects. Such graduate study or experience shall include detailed investigations of historic structures, preparation of historic structures research reports, and preparation of plans and specification for preservation projects.
